CLIMAX KLDs Offer Optimal Design Increasing Efficiency and Productivity

CLIMAX Keyless Locking Devices eliminate backlash and associated failure modes, resulting in optimized design, efficient operation, and increased productivity. CLIMAX KLDs prove their reliability at every stage of the metals industry, from the mine to the mill to the stamping plant. CLIMAX KLDs mount mechanical power transmission components with a zero-backlash interference fit, eliminating notch factors, fretting, pounded out keyways, and fatigue failures.
