

CLIMAX KLD Solutions
Prevent Downtime

INDUSTRY *Update*

Indexing Motion and Reversing Wear Out Keyed Connections

Wallowed out keyways cause backlash and create downtime. If your customer experiences problems with keyed connections, offer a CLIMAX Keyless Locking Device. KLDs, often found in small wind power, eliminate the need for keyed connections. Damage and downtime are common results of backlash, fretting, and erosion of keyways. CLIMAX KLDs prevent damage and downtime, provide exceptional holding power, and resist torque reversals.
